

The CE Marking Association is here to help!

We understand the problems faced by all manufacturers, who often get lost in the maze of CE Marking and compliance with UK and EU Legislation. We can provide **accurate** and **unbiased** help to get your products ready for market. We can guide you through the process by providing a range of **cost effective** services to make compliance **simple**, without cutting corners.

Consultancy

Guiding you through CE Marking

We offer a pragmatic and cost-effective approach in providing assistance at any stage, from initial concept through to production, and also offer assistance with on-going conformity requirements. If you are new to the CE Marking process or just require our occasional support, then we can help in many ways.

- Unbiased and accurate information regarding product legislation
- Understanding your CE Marking Directives
- Guidance on how to meet your legal obligations
- Keeping it simple and talking your language
- Assistance with implementing compliance processes
- Auditing of your current compliance practices

We can provide you with as much or as little help as you need, from fully testing your product in our laboratory using a turn-key approach, to holding your hand and guiding you through the process by showing you how you can perform your own tests and assessments.

“Particularly helpful... we would have no hesitation in recommending the CE Marking Association”

Roger Bannister, Tyco

Testing and Compliance Services

Flexible solutions to your compliance needs

We can help you get your products or machinery ready for market with our extensive range of testing and compliance services. Our engineers are experienced in helping manufacturers get their products compliant.

At our EMC, Radio Frequency and Low Voltage (Electrical Safety) testing facilities, tests are undertaken in accordance with the applicable harmonised standards.

We can also perform;

- Standards Assessments
- Risk Assessments
- Machinery Directive Assessments
- Medical Device Directive Assessments
- ATEX Directive Assessments
- Pressure Equipment Directive Assessments
- Electrical Safety Assessments & Testing
- Mechanical Testing

Whatever your product, contact us to discuss how our facilities, resources and expertise can help you find a simple or cost-effective solution to meeting your compliance requirements.

“Good value for small businesses”

Ray Maybury, Fortress Interlocks

ElectroMagnetic Compatibility (EMC) Testing

In-chamber and on-site EMC testing options to match your requirements

We are equipped to provide a comprehensive range of emissions and immunity testing to help you meet your legal requirements under the EMC and Radio Equipment Directives.

Our test facility is setup to allow us to test a wide range of products, but should your product or machine be impracticable to bring to us, then we can come to you.

Our EMC test engineers are committed to help our clients achieve compliance to the relevant standards and should your product demonstrate a non-conformity, we have the facilities, resources and expertise to investigate the possible solutions at the point of test.

“I would recommend that anyone who needs help with CE Marking consider contacting the CE Marking Association first.”

Glenn Campbell, Ultra Electronics

Training Solutions

Putting you in control

By learning how to 'design for compliance', or how to assess and certify your own products, you could drastically reduce the cost of CE marking. The CE Marking Association can help you develop your in-company expertise with our range of public workshops or a bespoke CE Marking training course.

We're experienced in providing a multitude of training services, both on-site and at our dedicated training facility, including:

- Public workshops and seminars
- In-company group training
- Shadow training
- One-to-one consultancy

A comprehensive range of standard, specialist and bespoke training courses can be provided. We can; show you how to perform your own tests and assessments; help you understand the CE marking process; help you identify the right Directives and standards; help you compile your own Technical Construction File; and, show you how to keep your company up-to-date with new legislation.

Association Membership

Protect your business by staying informed

Membership of the CE Marking Association can protect your business by being aware of changes in Directives and legislation that may affect the ongoing conformity of your products or machinery, and having access to continued support from our technical team.

Over the last few years many significant changes have occurred in almost all of the CE Marking Directives and UK Product Legislation. These changes to the Directives have had a considerable impact on manufacturers, distributors, or importers in the EU. If your company is considering becoming a member, this will enable you to be kept up-to-date with the changes as they happen, in addition to the many other benefits that the Association offers.

"Good to have the CE Marking Association just a call away."

Mike Flood, Director, 2XL Electronic Services
